DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-30, drawn to a tissue product lacking a dispersing agent, classified in class 510, subclass 130.
- II. Claims 31-59, drawn to a tissue product containing a dispersing agent, classified in class 510, subclass 130.

The inventions are distinct, each from the other for the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP §806.04, MPEP §808.01). In the instant case Group I is directed to a tissue product lacking a dispersing agent while Group II is directed to a tissue product containing a dispersing agent.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even if the requirement is traversed (37 CFR 1.143).
